

From now on, all bilateral trade sheets are updated every month

From 2018 on, the bilateral trade sheets of the "Statistics" section containing trade figures between Belgium and all its trading partners will be updated every month. This means that from now on, 235 new sheets will be uploaded every month, no longer exclusively upon specific request.

The trade figures between Belgium and its partners are communicated by Eurostat within a period of 3 months. So there is a three-month turnover on the [latest figures](#).
